

ControllerBase

```
classDiagram
    class ControllerBase
    class ApplicantSessionController["Mediwatch.Server.Controllers.ApplicantSessionController"]
    ApplicantSessionController --|> ControllerBase
```

The diagram shows a class hierarchy. At the top is the 'ControllerBase' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. Below 'ControllerBase' is the 'Mediwatch.Server.Controllers.ApplicantSessionController' class, represented by a rectangle with three horizontal compartments. The top compartment contains the full class name. The middle compartment is empty. The bottom compartment contains a list of six public methods, each preceded by a '+' sign. A blue arrow with an open triangular head points from the top of the 'Mediwatch.Server.Controllers.ApplicantSessionController' class to the bottom of the 'ControllerBase' class, indicating inheritance.

Mediwatch.Server.Controllers.  
ApplicantSessionController

- + ApplicantSessionController()
- + GetApplicantSession()
- + GetApplicantSession()
- + PutApplicantSession()
- + PostApplicantSession()
- + DeleteApplicantSession()
