

ControllerBase

```
classDiagram
    class ControllerBase
    class TagController["Mediwatch.Server.Controllers.TagController"]
    TagController --|> ControllerBase
```

The diagram illustrates a class hierarchy. At the top is the 'ControllerBase' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. At the bottom is the 'Mediwatch.Server.Controllers.TagController' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. The middle compartment is empty. The bottom compartment contains a list of five methods, each preceded by a plus sign: '+ TagController()', '+ GetTag()', '+ PostTag()', '+ PostTag()', and '+ GetTag()'. A blue arrow with an open triangle head points from the top of the 'TagController' class to the bottom of the 'ControllerBase' class, indicating inheritance.
