

ControllerBase

```
classDiagram
    class ControllerBase
    class WeatherForecastController {
        + WeatherForecastController()
        + Get()
    }
    ControllerBase <|-- WeatherForecastController
```

The diagram illustrates a class hierarchy. At the top is the 'ControllerBase' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. At the bottom is the 'Mediwatch.Server.Controllers.WeatherForecastController' class, represented by a shaded rectangle with three horizontal compartments. The top compartment contains the full class name. The middle compartment is empty. The bottom compartment contains two public methods: '+ WeatherForecastController()' and '+ Get()'. A blue arrow with an open triangular head points from the bottom of the 'WeatherForecastController' class to the bottom of the 'ControllerBase' class, indicating that 'WeatherForecastController' inherits from 'ControllerBase'.

Mediwatch.Server.Controllers.  
WeatherForecastController

+ WeatherForecastController()  
+ Get()
