

ControllerBase

```
classDiagram
    class ControllerBase
    class UsersController {
        + UsersController()
        + GetUserList()
        + GetUser()
        + GetUserFormation()
    }
    UsersController --|> ControllerBase
```

The diagram illustrates a class hierarchy. At the top is the 'ControllerBase' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name, while the others are empty. Below it is the 'Mediwatch.Server.Controllers.UsersController' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name, the middle one is empty, and the bottom one lists four public methods: '+ UsersController()', '+ GetUserList()', '+ GetUser()', and '+ GetUserFormation()'. A blue arrow with an open triangular head points from the 'Mediwatch.Server.Controllers.UsersController' class up to the 'ControllerBase' class, indicating that 'Mediwatch.Server.Controllers.UsersController' inherits from 'ControllerBase'.

Mediwatch.Server.Controllers.  
UsersController

+ UsersController()  
+ GetUserList()  
+ GetUser()  
+ GetUserFormation()
