

ModelSnapshot

```
classDiagram
    class ModelSnapshot
    class ContextModelSnapshot["MediwatchWebsite.Server.Data.Migrations.ApplicationDbContextModelSnapshot"]
    ContextModelSnapshot --|> ModelSnapshot
```

The diagram shows a class hierarchy. At the top is the 'ModelSnapshot' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. At the bottom is the 'ContextModelSnapshot' class, represented by a rectangle with three horizontal compartments. The top compartment contains the full namespace 'MediwatchWebsite.Server.Data.Migrations.ApplicationDbContextModelSnapshot'. The middle compartment is empty. The bottom compartment contains the method signature '# BuildModel()'. A blue arrow with an open triangle head points from the 'ContextModelSnapshot' class to the 'ModelSnapshot' class, indicating inheritance.
