

ModelSnapshot

```
classDiagram
    class ModelSnapshot
    class DbContextMediwatchModelSnapshot {
        # BuildModel()
    }
    DbContextMediwatchModelSnapshot --|> ModelSnapshot
```

The diagram shows a class hierarchy. At the top is a class box for 'ModelSnapshot' with two empty compartments. Below it is a class box for 'DbContextMediwatchModelSnapshot' with three compartments: the top one contains the full class name, the middle one is empty, and the bottom one contains the method '# BuildModel()'. A blue arrow with an open triangle head points from the 'DbContextMediwatchModelSnapshot' box up to the 'ModelSnapshot' box, indicating inheritance.
