

IHostingStartup

```
classDiagram
    class IHostingStartup {
    }
    class Mediwatch_Server_Areas_Identity_IdentityHostingStartup {
        +Configure()
    }
    IHostingStartup <|-- Mediwatch_Server_Areas_Identity_IdentityHostingStartup
```

The diagram illustrates an inheritance relationship. At the top is the `IHostingStartup` interface, represented by a rectangle with three horizontal compartments. The top compartment contains the name `IHostingStartup`, while the other two are empty. Below it is the `Mediwatch.Server.Areas.Identity.IdentityHostingStartup` class, represented by a shaded rectangle with three horizontal compartments. The top compartment contains the class name, the middle compartment is empty, and the bottom compartment contains the method `+ Configure()`. A blue arrow with an open triangular head points from the top of the class box to the bottom of the interface box, indicating that the class inherits from the interface.

Mediwatch.Server.Areas.Identity.  
IdentityHostingStartup

+ Configure()
